Did Taylor Swift Get a Nose Job?

Ashley Rose

Just when you thought **Taylor Swift** was all natural, think again. There are reports the gorgeous singer got a nose job.

According to RadarOnline.com, Taylor's gone under the knife, and has supposedly been given a smaller nose. "Taylor Swift's nose looks much thinner and more refined than it did when she was younger," **Dr. Anthony Youn** of Youn Plastic Surgery told them.

"It looks like she had rhinoplasty, which is the plastic surgery that celebrities have had the most," says Youn. "I suspect that a plastic surgeon did a very subtle nose job, making it look as good as it does."

T-Swift's never confirmed if she's ever had plastic surgery before. There was speculation that she got her boobs done back in 2013, though.

Even if she did, what does it matter? Tay's still awesome and still beautiful no matter what. Really. Plus, she makes her own money. If she wants plastic surgery, why not let her get it?

Do you think Tay's gotten a nose job? Boobs? Chime in.
