

blog > beauty > multi-tasking beauty products

June 27, 2016

If you're running out of space in your makeup stash, it's time to start purchasing double-duty beauty products that can fulfil more than just a single purpose. Besides saving space, you'll get to cut back your spending.

3CE Lip Pigment, \$22, [Sephora](#). Nudestix Lip/Cheek Pencil, \$37, [Sephora](#).

Lip products that double up as blushers are the most useful products ever. We're talking about stains, creams and tints for the job. Besides, these blushers will look more glowy on your skin, as compared to a powder blush. All you need to do is to blend the product on your cheeks with your fingers and you're good to go! These are made for lazy folks out there; now you can avoid the trouble of finding matching lip and cheek shades when you can apply the same product on both. Yay!
