

We Tried It: Nudestix Skin Glossing Pencil

Glow forth this summer with beauty's newest trend: glossy skin.

Daley Quinn | August 21, 2016

Going dewy is the new beauty “do,” and we’re loving the look. Swap out your shimmery highlighters and angled brushes for a glossier finish with products that can be applied all over the face. Our current fave is the new **Nudestix** Skin Glossing Pencil. This easy-to-use glide-on stick can be applied to the cheekbones, Cupid’s bow and eyelids for a highlighted look without added color. Best of all, you can apply this product right on top of eye shadow, lipstick and blush for added sheen.

Better yet, the Nudestix Skin Glossing Pencil is good for your skin. It’s packed with vitamins, antioxidants and moisturizers, plus the portable mirror-lined tin case allows for easy, on-the-go application. With Nudestix, you can gloss like a boss!

Nudestix Skin Glossing Pencil, \$24, sephora.com.
