Joyus | November 12, 2016

Video Summary: One of the most common makeup questions we get is how to wear a nude palette without looking washed out. We've found **Nudestix's** gorgeous trio of lip & cheek pencils that are oh-so-easy to use and will work on every skin tone. A nude face can set the stage for a great, dramatic eye or you can keep it light all over for that no makeup, makeup look. Watch Celebrity Makeup Artist Naomi Priestley show you how to make these nudes work for you.
