Liquid lipstick is EVERYWHERE right now — it seems like every single one of our favorite brands have developed their own line of this insanely popular product. It's about time we get a little variation on the theme, and it looks like **Nudestix** new Magnetic Matte Lip Color collection is pretty much liquid lipstick in pencil form! Doesn't that just sound like the most convenient way to get the liquid lipstick look? Throwing a lip pencil in your bag and swiping it on requires a bit less precision than using a traditional liquid lipstick, don't you think?

**There are 8 gorgeous new shades in this collection, each one more beautiful than the last!**

And since they're made by Nudestix, you know these babies will glide on smoothly and evenly, and you don't have to worry about feathering or smudging either! Not only is the product itself beautiful, but Nudestix prides itself on formulating makeup that is paraben, sulfate, phthalate, and cruelty-free. It's gentle enough for extremely sensitive skin, which is great because there's nothing worse than getting a rash or breakout near your mouth.

Are you as into these lip pencils as much as we are? Head on over to Sephora or Nudestix to pick up your own!
