

## Dentist Dr. Bill Dorfman Sets World Record with Katy Perry's Grill!

By The Doctors Staff | February 6, 2018

Our frequent guest on *The Doctors*, dentist Dr. **Bill Dorfman**, has set the world record of "Most Valuable Grill" from The Guinness World Records - his second honor from the organization. Dr. Dorfman designed a \$1 million grill for the singer that was used in the video for her hit song "Dark Horse." We chatted with Dr. Dorfman about creating Katy's amazing jewel-dripping mouthpiece.

***How involved was Katy Perry in helping to design and create the grill? Did she have any special requests?***

"Actually, I did all the work with her make-up artist Jonny Wundk. Jonny came to me with a request to make a grill for Katy's new music video and my initial thought was to go all out – this is Katy Perry, after all."

***Tell us about the precious stones used in this impressive grill.***

"My good friend Cheryl Alpert owns XIV Karats in Beverly Hills and gave us the stones on consignment – we used several precious gemstones and a flawless diamond."

***What happened to the grill after the "Dark Horse" video?***

"After the music video was shot and the grill was no longer needed, we had to disassemble the diamond and gemstone and return them to XIV Karats. LOL - Over a million dollars in gems was a steep price!"

***Are there any concerns or dental dangers when it comes to wearing a grill?***

"YES!!!! Normally they are just for 'looks' not for function. Also, you must still brush and floss under them."

***Do you have any advice for first-time grill wearers?***

"It's important to go to a dentist. Don't try this alone or with a make-up artist because you can ruin your teeth."

***Now that you hold the record for creating "Most Valuable Grill," how do you top this?***

"Seeing as this is my second record, I am going to apply for a third one and then maybe even the record for the MOST GUINNESS RECORDS!!!"
