Why settle for what's expected when you could surprise your sweetheart with something amazing, cool and yes, romantic too? Switch it up this year with some super creative gift ideas. Check out these unique Valentine's Day gifts that practically guarantee you'll win their heart.

Best Guarantee of Sweet Smiles: Mobile White Advanced Teeth Whitening Kit

Sure, you could send your Valentine to the dentist for expensive whitening treatments that cost hundreds of dollars, or you could give them the gift of sweet smiles for life for less than \$80. You choose. We don't know anyone who wouldn't be thrilled with the thought of whiter teeth, but the fact is, most of us don't have the time and cash for those professional treatments - that is, until now.

This device controlled teeth whitening kit comes with everything your sweetie is going to need for the brightest, whitest smiles. And you can feel assured you're not getting some kind of quackery, because this kit was developed by one of America's most famous dentists, **Dr. Bill Dorfman**. He's the dentist behind some mighty famous smiles (think Britney Spears and Usher) and this kit has been featured on national television shows from Oprah to The Doctors.

Unlike those strips from the drugstore, this kit won't damage your precious pearlies or cause sensitivity. It comes with a 16 LED light tray with USB cord and timer button. It also comes with Mobile White whitening gel, four syringe applicators, mobile device adapters and a storage case with a mirror.

You can whiten at home or on the go, because once you plug the adapter into your device, it powers the light tray for a professional whitening session in just 20 minutes that targets yellowing, coffee and wine stains and even discoloration from smoking. If you join their Bright for Life Club, you'll get free whitening gel refills for life.
